

Target mobile-mvvm

No malicious behavior observed

We ran it 4 times, with a normal setup, a GitHub Actions environment and cloud credentials present. It made no network connections. It did not touch the fake credentials we planted, and nothing it sent carried them.

Findings summary

ID	Severity	Confidence	Finding
F01	Low	Info	Loaded the project's .env file

Observed behavior

Install step	none
Runs as	ls -la; find . -maxdepth 3 -not -path; head -100; ls -la ./skill; find ./skill -type f; head -50
Network	no connections
Credentials	./.env (read)
Files written	nothing outside its own folder

Finding details

F01 Loaded the project's .env file

Severity: Low Confidence: Info Observed in: llm:baseline
The package loaded the project's .env file.

Description

The process loaded the project's .env file. Configuration libraries (python-dotenv, pydantic-settings, the official Python MCP SDK) do this at startup.

Impact

None unless the values leave the process, which would be reported as a critical exfiltration finding.

Evidence

```
./.env (by cat)
```

Remediation

No action needed. Keep long-lived secrets out of project .env files where possible.
