

Target lawn-calendar-chemist

No malicious behavior observed

We ran it 7 times, with a normal setup, LC_MESSAGES set, docs:soil-temp --air-mean 52 and a GitHub Actions environment. It made no network connections. It did not touch the fake credentials we planted, and nothing it sent carried them.

Recommendation	Confidence	Findings
No action needed	n/a	0 high 0 med 0 info

Nothing observed calls for action. This is evidence, not a guarantee.
