

Target real-mars-shot

No malicious behavior observed

We ran it 8 times, with a normal setup, REALMARSSHOT_SAVE_DIR set, a GitHub Actions environment, LC_MESSAGES set and docs:--topic dose --transit-shield. It made no network connections. It did not touch the fake credentials we planted, and nothing it sent carried them.

Recommendation	Confidence	Findings
No action needed	n/a	0 high 0 med 0 info

Nothing observed calls for action. This is evidence, not a guarantee.

Scope

Package	real-mars-shot
Source	clawhub 1.0.0
