

Target aimegeo-schema-markup

No malicious behavior observed

We ran it 8 times, with a normal setup, LC_MESSAGES set, docs:build examples/company-faq/draft.json --visible-text, the clock moved a year ahead and a GitHub Actions environment. It made no network connections. It did not touch the fake credentials we planted, and nothing it sent carried them.

Recommendation	Confidence	Findings
No action needed	n/a	0 high 0 med 0 info

Nothing observed calls for action. This is evidence, not a guarantee.
