

Target mobile-eu-compliance

No malicious behavior observed

We ran it 1 time, with a normal setup. It made no network connections. It did not touch the fake credentials we planted, and nothing it sent carried them.

Observed behavior

Install step	none
Runs as	ls -la; head -100; find . -maxdepth 2 -not -path; ls -la ./skill; ls -la ./skill/references; ls -la ./skill/docs
Network	no connections
Credentials	./.env (read)
Files written	nothing outside its own folder

Finding details

F01 Loaded the project's .env file

Severity: Low Confidence: Info Observed in: llm:baseline
The package loaded the project's .env file.

Description

The process loaded the project's .env file. Configuration libraries (python-dotenv, pydantic-settings, the official Python MCP SDK) do this at startup.

Impact

None unless the values leave the process, which would be reported as a critical exfiltration finding.

Evidence

```
./ .env (by sed)
```

Remediation

No action needed. Keep long-lived secrets out of project .env files where possible.

Observed behavior only. A clean result does not prove a package is safe. Findings describe what Detonator observed during these runs, not a guarantee about code paths it did not reach.
