

Target nimble-decision

No malicious behavior observed

We ran it 8 times, with a normal setup, NIMBLE_AGENT_ID and NIMBLE_CONFIG and WATCH_REPORT_DEPENDENCIES set, NIMBLE_NO_LOG=1 set, JEST_WORKER_ID and NIMBLE_AGENT_ID and NIMBLE_CONFIG and NODE_V8_COVERAGE... set and NIMBLE_AGENT_ID and NIMBLE_CONFIG and SKILL set. It made no network connections. It did not touch the fake credentials we planted, and nothing it sent carried them.

Observed behavior only. A clean result does not prove a package is safe. Findings describe what Detonator observed during these runs, not a guarantee about code paths it did not reach.
