

Target monitor-center

No malicious behavior observed

We ran it 8 times, with a normal setup, LC_MESSAGES set, docs:setup, ARI_BASE_URL and LC_MESSAGES and REQUEST_METHOD and SSLKEYLOGFILE set and docs:configure. It contacted ari.funewa.com. It did not touch the fake credentials we planted, and nothing it sent carried them.

Finding details

F01 Network destinations contacted

Severity: Low Confidence: Info Observed in: scripts:docs:setup
The package connected to these hosts.

Description

Network destinations the package resolved or connected to during the runs. All traffic was captured by the sandbox; nothing reached the internet.

Impact

Context only. Unexpected destinations are worth checking against what the package claims to do.

Evidence

```
ari.funewa.com
```

Remediation

Confirm each host is expected (the package's API, its registry). Allowlist expected egress in production.
